What do we offer?

- We offer a software and hardware micro mobility solution
- Possibility to connect electric cars, electric mopeds and other vehicles.

Where can you use our solution?

- Our products can be used by different local restaurants to deliver food in the city without the need to own their own vehicle.
- Clothing stores that want to offer their customers a delivery option.
- Public or private companies that need an easy car sharing service for the employees with the possibility to use a micro vehicle as well.

Examples

- Today different micro mobility companies have partnered up with food delivering services like Wolt, Voi and Foodora.
- Bring and Comarth.

Thank you!
